

Interskill Learning Releases New Mainframe Skills Assessment

ATLANTA (November 1, 2007) - Interskill Learning Releases an exciting new mainframe education resource for its clients. Mainframe Skills Assessment provides the measurability so vital to an effective mainframe education solution.

"Extensive banks of mainframe focused, scenario based questions enable an organization to accurately evaluate the strengths and weaknesses of their mainframe workforce." said Interskill Learning's Vice President, Darren Surch. "As any mainframe IT Manager will surely agree, this sort of data is priceless!"

Students will use the testing to benchmark their current skill levels and after a series of training (any or all of classroom, e-learning, OJT, mentoring) they will test again and quantify their improvement in knowledge base and skill set. Managers will analyze the data gathered to identify skill gaps, determine future training needs, measure the effectiveness of the training used and calculate ROI. It can even be used to evaluate new hires or job applicants!

About Interskill Learning

Interskill Learning, headquartered in Atlanta, Georgia, is the worldwide leader in the provision of technology based, mainframe education solutions. Interskill's offerings include a comprehensive range of products:

- **zSeries, iSeries and UNIX courseware:** The industry's most comprehensive, technology-based education offering, encompassing over 150 titles of unmatched depth, breadth and currency.
- **Mainframe Skills Assessment:** Extensive banks of scenario based questions enable an organization to accurately evaluate the strengths and weaknesses of their workforce. Analysis of the data can be used to set benchmarks, identify skill gaps, measure learning effectiveness and calculate ROI.
- **Learning Plans:** Provides individuals with a graphical, defined path of learning activity that offers direction, motivation and lays the foundation for technical competence in their z/OS job role. Can be tailored to reflect your particular systems and/or job role requirements
- **MyInterskill™ Learning Management System:** Delivers e-learning courses, skills assessment, learning paths, mentoring and more – at your personnel's fingertips via the web. Managers designate courses and extract comprehensive reporting on employee progress and results.
- **LMS Interoperability:** Interskill products deploy via any SCORM or AICC compliant LMS.
- **Custom e-Learning Content Development:** We bring our renowned quality to your e-learning project. Let us show you how simply & inexpensively you can have world class e-learning on your topics.
