

## Interskill Learning z/OS Curriculum upgraded to z/OS V1.8

ATLANTA (October 1, 2007) - Interskill Learning Releases new z/OS v1.8 e-learning courses and expands the series to 28 hours.

"This release of Interskill Learning's z/OS v1.8 e-learning courses further enhances this product as the only real electronic education resource for the mainframe computing industry." said Interskill Learning's Vice President, Darren Surch. "There is nothing else out there that is even at z/OS levels!"

Interskill Learning is serious about creating a successful learning experience for your z/OS mainframe computing personnel. As well as focusing on the technical aspects of online learning, we try to focus on the learning itself, and how technology can be used to facilitate advanced learning outcomes.

Our learning designs are informed by contemporary learning theory and are interactive, contextualized and responsive to diverse learning styles. We believe in immersing learners in relevant authentic activities that are designed to motivate, engage, and produce quantifiable change.

### About Interskill Learning

Interskill Learning, headquartered in Atlanta, Georgia, is the worldwide leader in the provision of technology based, mainframe education solutions. Interskill's offerings include a comprehensive range of products:

- **zSeries, iSeries and UNIX courseware:** The industry's most comprehensive, technology-based education offering, encompassing over 150 titles of unmatched depth, breadth and currency.
- **Mainframe Skills Assessment:** Extensive banks of scenario based questions enable an organization to accurately evaluate the strengths and weaknesses of their workforce. Analysis of the data can be used to set benchmarks, identify skill gaps, measure learning effectiveness and calculate ROI.
- **Learning Plans:** Provides individuals with a graphical, defined path of learning activity that offers direction, motivation and lays the foundation for technical competence in their z/OS job role. Can be tailored to reflect your particular systems and/or job role requirements
- **MyInterskill™ Learning Management System:** Delivers e-learning courses, skills assessment, learning paths, mentoring and more – at your personnel's fingertips via the web. Managers designate courses and extract comprehensive reporting on employee progress and results.
- **LMS Interoperability:** Interskill products deploy via any SCORM or AICC compliant LMS.
- **Custom e-Learning Content Development:** We bring our renowned quality to your e-learning project. Let us show you how simply & inexpensively you can have world class e-learning on your topics.
