

Interskill Learning Releases New Mainframe Learning Plans

ATLANTA (November 1, 2007) - Interskill Learning Releases an exciting new mainframe education resource for its clients. A broad selection of Learning Plans for mainframe computing personnel will guide mainframe operators and programmers along a path of education -- the destination being complete competency in their mainframe job role.

"Learning Plans provide the structure vital to effective mainframe education." said Interskill Learning's Vice President, Darren Surch. "Clients already using the Learning Plans report dramatically increased course usage and a new energy among their personnel to train."

Customization

As the responsibilities and requirements of job roles vary between companies, Interskill offers (at no cost to its clients) modification of the Learning Plan documents to suit your exact specifications. Add or remove e-learning courses, classroom, OJT, manuals, internal documents – you tell us what you need!

About Interskill Learning

Interskill Learning, headquartered in Atlanta, Georgia, is the worldwide leader in the provision of technology based, mainframe education solutions. Interskill's offerings include a comprehensive range of products:

- **zSeries, iSeries and UNIX courseware:** The industry's most comprehensive, technology-based education offering, encompassing over 150 titles of unmatched depth, breadth and currency.
- **Mainframe Skills Assessment:** Extensive banks of scenario based questions enable an organization to accurately evaluate the strengths and weaknesses of their workforce. Analysis of the data can be used to set benchmarks, identify skill gaps, measure learning effectiveness and calculate ROI.
- **Learning Plans:** Provides individuals with a graphical, defined path of learning activity that offers direction, motivation and lays the foundation for technical competence in their z/OS job role. Can be tailored to reflect your particular systems and/or job role requirements
- **MyInterskill™ Learning Management System:** Delivers e-learning courses, skills assessment, learning paths, mentoring and more – at your personnel's fingertips via the web. Managers designate courses and extract comprehensive reporting on employee progress and results.
- **LMS Interoperability:** Interskill products deploy via any SCORM or AICC compliant LMS.
- **Custom e-Learning Content Development:** We bring our renowned quality to your e-learning project. Let us show you how simply & inexpensively you can have world class e-learning on your topics.
