

You're covered for the future.

Leave your mainframe training worries behind with elearning from Interskill.

Courses

Over 250 highly interactive elearning titles covering the range of training needed by your IBM z Systems personnel.

Assessments

Strategic skills assessments capture objective data to benchmark knowledge, identifying skill gaps.

Analytics

Detailed reporting on all training interaction provides objective workforce skills data at your fingertips.

Structure

Training roadmaps provide year-round direction for personnel and aid in minimizing input required from busy managers.

Smarter Mainframe Workforce Training

When those inevitable 'rainy days' happen, a highly trained, multi-skilled mainframe workforce will ensure your organization is prepared!

Empower your employees with year-round, anytime, anywhere access to over 250 IBM z Systems elearning courses, skills assessments, learning road maps, a mentoring forum, class/webinar development tool, data analytics, and reporting. Blended with traditional classroom training, Interskill's elearning solution dramatically cuts overall mainframe training costs and significantly increases training completed annually - all of which translates to the ongoing success of your mainframe computing organization!

Don't Just Take Our Word For It

“Interskill's elearning solution is flexible, cost effective, and a great way to spread mainframe knowledge right through an organization. Just try it!”

- Distinguished IBM Engineer and CTO on z Systems
